Invitation to Lunch

24 October 12:00-13:00

KG10, Kungsgatan 8, Stockholm

Historical and future development of ESG investments

Welcome to a lunch presentation and panel discussion on **impact investing** with NRP Zero and Carl Hall.

Carl Hall is a Cleantech investment pioneer. He founded **Alder** in 2008, one of the first, and now largest cleantech private equity firms in the Nordics. Carl has extensive experience from private equity and is in addition a serial entrepreneur. He is member the board and co-founder of Lakers and has a background from Bain & Co and is the author of the book **The Environmental Capitalists**, published in 2014.

NRP Zero is a fund manager focused on investments in Nordic industrial cleantech companies in the mid- to late venture phase. NRP Zero targets companies within energy transition or resource efficiency, at the inflexion point of commercial scale-up.

Applying an active ownership approach, the team partners with founders and companies that have commercialized products, solutions, or services, that have capital light and scalable business models, to grow and institutionalize their companies to attract industrial buyers.

The investment team comprises a partner group of five industry professionals with deep active ownership experience and relevant sector expertise from inter alia HitecVision, Golar LNG, Klaveness Marine and Pacifico.

AGENDA

- A historical backdrop: how and why ESG investing came about.
- Bridging the financing gap for cleantech solutions: PE/VC perspective.
- Current trends of ESG investing in the Nordic landscape.
- Regulatory tailwinds and inflows into green products: Article 8 and 9 funds.
- What to expect going forward?
